

ABE 460

Lab [number]: *Put Lab Title Here*

Put your name here

Put the date of the lab here; not the due date

Put your lab section here: either 'Monday' or 'Wednesday'

General Guidelines:

1. Lab reports are due at the very beginning of the next lab, late lab reports will not be accepted
2. As stated in the syllabus:
Most of the laboratory exercises will require a written lab report. I am looking for a brief review of the lab procedures/setup, along with key data and analyses in graphical form (if possible), and a discussion of the results and their significance. i.e. did you learn something from the exercise, or just blindly follow the procedures?
Late assignments will receive no credit.
3. Be sure to label all figures, tables, graphs. Be sure to include units if necessary (e.g. m, kg, kW, etc.)
4. Include page numbers on your report at the lower right corner of the page.
5. Include any and all Matlab code, parameters, Simulink figures, etc.
